Business Profile

Valued Colleague

Our business is in promoting quality components and equipment in the Photonics and Fiber Optics space in Israel. We offer a variety of components and systems, since 2004. These can be divided in the following categories:

Optics

Lasers

Cameras

Fiber Optics

Detectors

Spectroscopy

Light Sources

LED's

Opto Mechanics

Electronics

Optics Cleaning

Our motive of "Photonics with Know How" comes to stress that we always will try to offer the best solution for the application of the customer. This clearly differentiates us in this complicated and fast developing branch.

The standard service to our customers includes a basic and free of charge technical assistance and strives to offer tailored solutions to technology advanced teams.

To overseas companies we offer a unique marketing channel that has direct access to more than 5000 of the key decision-makers in Israel's Advanced Industries. We inform these with a monthly newsletter on recent developments in the field and new products offered. We maintain an informative web-site www.ilphotonics.com that usually updates several times a month, and has been viewed by more than 10,000 visitors.

We provide quick and clear responses and quality filing one may expect from a true business partner. We trust that you will experience our motto to "meet and beat your expectations" to differentiate us in this challenging market.

The General Manager of the company, Moshe Bril is considered one of the local experts in the Photonics Market, trend and applications, backed by day to day Contact with many key designers at various local companies, as well as by following professional publications and attending trade-shows and contacts with overseas manufacturers and customers for more

Business Profile

than 24 years. In these years he managed to enter many \$10M of components and systems to OEM equipment that have been sold at more than 1 \$B. He holds a Masters in Physics from the Laser Center of the VU University, Amsterdam the Netherlands, and 3 patents. The core staff further includes,

Nachum Traub Sales Engineer

Dr. Assaf Levanaon Service Engineer

Berta Bril Office Manager

Chanan Raber Sales Support

David Richard Sales Engineer and Computer Technician.

In addition to additional staf making the official employee count as of January 23rd 2018 at 8.

We fully support the following languages: English, Hebrew and Dutch. Further we accept correspondence and literature and offer basic support in German, French, Italian and Portuguese.

We service many customers. The vast majority comes from one of the below fields:

Medical/Dental diagnostics

Medical/Esteatical light treatment

Automatic Optical Inspection

Gesture recognition

Autonomous cars / Cars Safety

Machine vision

Telecommunication

Semiconductor inspection

Electronic Printing

Laser manufacturing

Display

Optical components manufacturing.

and there are still other applications where you can find our customers.

IL Photonics is located in Beit Shemesh, between Jerusalem and Tel-Aviv the 2 major cities, in the very center, and one of the fastest growing city of Israel, within an hour drive of most of the local customers.

As the business of our customers greatly relies on third parties components it will be important to have vendors that consider their expectations as part of the specification. Or better:

Get what you want to get.

Our philosophy therefore is not only to sell samples, but integrate these components that will prove their value over the lifetime of the product of the customer. To reach this standard we use only Photonics expert for the sales of these components and let them pay off only with the successful selling of your product.

IL Photonics provides and markets professional services and products from world-leading companies to customers in Israel. As our expertise on the Photonics market is exceptional define our mission:

*Marketing and distributing Electro-Optical components and systems in Israel,
and provide value added solutions to local companies in this space.*

We invite local customers to call for a meeting wherein we sit down to understand your immediate and long term need in order to come with a tailored solution to help your business.

We invite quality suppliers of electro-optic components and systems to discuss with us the local promotion of their products.
